

JK-F161

JOCKY

Automatic elastic ribbon splicing machine,
with rotating material collecting device, ironing device

Features

1. Two types of splicing, stacking and flat splicing. Automatic operation, feeding, cutting, splicing, receiving, all in one time. One worker can operate 5 sets machines at the same time.
2. Easy to adjust the size, special locking nuts designed to significantly reduce the difficulty of adjusting the size of the rubber bands.
3. The machine will automatically stop when there is a joint or run out of the elastic bands .
4. Using panasonic colour-coded identification system for two-colour rubber band sewing, which can accurately identify the position of logo and ensuring precise alignment between the logo and the elastic band.

MORE INFORMATION

Technical Specification

Model	JK-F161
Max. speed	2,800sti/min
Needle type	DYx17
Sewing range	15x65mm
Finished elastic diameter	110-999mm
Air pressure	0.5Mpa, 1.8L/min
Sewing output	5500 pieces / 10 hours
Rotary collecting output	100 pieces per rod, 500 pieces per time
Voltage	1P 220V 50-60HZ
Dimension	1230x990x1300mm
