Automatic clothes folding packing machine

## Features

An economical automatic garment folding and packaging equipment. Small size, small floor area, high cost performance, suitable for small and medium-sized garment factories, and the machine has strong universality and a wide range of applicable garments.

The machine realizes the continuous operation of garment automatic folding and automatic packaging, improves the standard degree of garment folding and folding packaging efficiency, and greatly reduces the labor cost. It is suitable for all kinds of garment enterprises.

The packing speed of the machine is 8-10 pieces per minute and 450-550 pieces per hour (related to the speed of manual laying clothes). One machine with 2 workers can pack 4000-5000 pieces per day.

# MORE INFORMATION

## Applicable clothing

Not applicable to :

Chiffon, silk and other texture clothing, super soft surface clothing with too many accessories, cotton clothes and down clothes, And other clothes that are not easy to form under the condition of manual folding.

## Applicable plastic bag

PE / PP / OPP self-adhesive envelope plastic bag, with the width of 23 ~ 42cm;  
Not applicable to zipper bags, flat pockets and pillow bags.

## Machine functions

- 1 : Automatic folding clothing, automatic bag opening by machine and automatic bag entry of clothing.
- 2 : The length and width of clothing after folding can be adjusted and set arbitrarily within the allowable value range.
- 3 : The machine can automatically detect the length of clothes. When the size of clothes is different, the machine can intelligently identify and automatically fold the corresponding first fold length,  
Ensure uniform length after folding, so that clothes of different sizes can be folded into uniform size and bagged without changing plastic bags
- 4 : The machine can automatically calculate the number of completed pieces and set multiple alarm functions
- 5 : The machine can be used separately in two sections:  
Part1 folding machine can only fold into the bag  
Part2 bag feeding machine, only bag feeding without folding.

## Technical Specification

Model	Minimum width of clothing(mm)	350	Maximum width of clothing(mm)	900
JK-PK130	Minimum length of clothing(mm)	400	Maximum length of clothing(mm)	800
	Minimum width after folding(mm)	200	Maximum width after folding(mm)	380
	Minimum length after folding(mm)	200	Maximum length after folding(mm)	400
	Minimum size of plastic bag(mm)	280*230	Maximum size of plastic bag(mm)	500*420
	Maximum packing speed(PCS / h)	600	Bag sealing type	Manual bag sealing
	Voltage (V)	220	Air pressure (MPA)	0.6
	Maximum power (kw)	0.8	Machine size (mm)	Front part : 1840*1050*1150 Behind part : 880*550*1080
