

JK-TD1000B

JOCKY

Tunnel shaping drying and disinfecting machine

Features

1. This machine is mainly used for drying, wrinkle removal, ironing and finishing of clothes after washing.
2. It is suitable for all kinds of chemical fiber, polyester-cotton, blanket, wool, such as cotton, linen and leather treated fabrics to achieve high-quality drying and ironing finishing.
3. With PLC and computer systems are used to control the operation cycle process of steam, heating unit and hot air. The constant temperature steam control system ensures efficient drying and efficient wrinkle removal finishing effects.
4. The system is simple and convenient to operate, with high operating efficiency and good finishing effect. It is widely used in garment manufacturing and washing factories.
5. Plush self-cleaning and falling object detection and alarm functions.
6. Automatically transport side-entry, share wind, maximize heat source and energy, and increase production capacity

MORE INFORMATION

Technical Specification

Model	JK-TD1000B
Processing capacity	300~400 pieces/h
Air pressure	0.5Mpa
Steam pressure	0.5Mpa
Power	30000W
Air consumption	60L/h
Steam consumption	260Kg/h
Air connection	1/4 (10mm air pipe)
Steam connection	Steam inlet 2', return steam port 1/2'
Voltage	380V three phase
Machine size	11000x1580x2375mm
Packing size	11000×1580×2375mm
Weight(G.W/N.W)	2500/2300kgs
