

JK1008-2T

Automatic pocket welting machine

JOCKY

Features

1. This machine is suitable for real pocket, fake pocket, T-shirt placket, especially the zipper of sports pants, which can be completed at one time, which is three times of the ordinary pocket welting machines.
2. With automatic non-iron folding pocket mechanism, it adopts the cylinder automatic folding technology, which improves the production efficiency and saves labor by eliminating the need for ironing table to fold the pocket.
3. The automatic shrinkage mechanism of the internal pressure frame makes the change of the pocket's edge trace not limited. The internal pressure frame adds the function of replaceable adjustment.
3. Automatic collecting mechanism, after machine sewing, the automatic manipulator is used for collecting, and the sewing products can be placed neatly.
